

# NUDGE CREATION API DOCUMENTATION

## NUDGE

A Nudge is a reminder/notification that users can create for events. It has:

- Tag, article or event
- Title
- Image
- Scheduled date/time
- Description of the nudge
- Icon and Invitation text (for minimized view)

## NUDGE DATA MODEL

```
{  
    type: "nudge",  
    uid: Number,  
    event_id: ObjectId,  
    title: String,  
    image: String,  
    schedule: Timestamp,  
    description: String,  
    icon: String,  
    invitation: String,  
    created_at: Timestamp  
}
```
